

## CAPABILITIES STATEMENT

The background image shows a large-scale construction project. In the foreground, a yellow Komatsu PC 350 LC excavator is positioned on a dirt surface. To its right, another yellow excavator with 'STRAIGHTLINE EXC.' branding is visible. In the background, a large, multi-tiered concrete retaining wall is under construction. Several workers in high-visibility vests are standing near the base of the wall. The scene is set in a deep excavation area with exposed earth and some construction materials scattered around.

**STRAIGHTLINE**

Straightline (SLE) Group  
are a Victorian owned  
and operated company,  
formed in 2004.

We provide basement  
retention packages,  
construction earthworks  
and environmental  
remediation.

## WHO WE ARE

### Established in 2004, SLE Group specialise in solutions for Greenfields and Brownfields developments.

**SLE Group directors and managers have a combined experience of over 80 years. SLE Group's project team includes project directors, project managers, environmental and civil engineers.**

We pride ourselves on understanding, communication, loyalty, and transparency in our relationships with employees, suppliers, and clients, delivering excellence in all aspects of project delivery.

The internal collaboration between our companies and focus on sustainable solutions, aligned with the most current laws and guidelines provides our clients with both the most sustainable and financially viable outcomes for their clients.

SLE Group are an equal opportunity employer. As a progressive business, we are considerate of and implement all environmental, quality, safety, social, equality, local jobs first requirements of proposals and project delivery.

**"We pride ourselves on understanding, communication, loyalty, and transparency in our relationships with employees, suppliers, and clients, delivering excellence in all aspects of project delivery."**

# OUR CAPABILITIES

**STRAIGHTLINE**

## PROJECT MANAGEMENT AND ESTIMATION

Our project management team has extensive knowledge and experience in preliminary design, execution and management of all projects relating to the civil and building industry. We ensure to provide a dedicated project manager to all of projects, big or small.

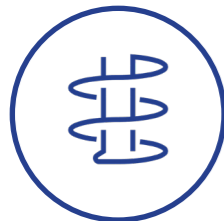

With personalised attention, we strive to provide our clients with exceptional service throughout our scope of works.

With projects managed and administered by a central operations unit, we are

significantly capable of delivering projects on program, with the highest standard of quality and utmost regard to safety and the environment.

Whether is a preliminary budget or detailed tender, our estimating department is always available to provide a competitive price.

In addition to estimation, we offer feasibility cost analysis and alternative construction methodology comparison to our potential and established clients.

## BASEMENT PACKAGES

Our in-house engineers offer innovation through review of proposed plans and programming, streamlining, and improving costs and delivery times through our experienced personnel, industry knowledge and experience.

We provide innovative design and construct or construct only packages

for basement construction. We provide simple, easy, and cost-effective construction for our clients to monitor, budget and maximise program to ensure your project is delivered on time, every time. We can deliver all aspects of basement retention systems.

## EXCAVATION AND GROUND ENGINEERING

We offer solutions for bulk, detailed and groundwork excavation with an extensive fleet of trucks, excavators and earth moving equipment. We provide bulk earthworks including sites strips, site cuts, deep excavation and backfill. We also provide detailed excavation for batters, benches, pads, strip footing and pile caps. Our environment page describes our

contaminated land and hazardous material capabilities.

We offer site engineered capping for all site for all purposes including landfill and contamination and have all personnel and plant to deliver these works. Further information to site-specific applications is provided on the site remediation page.

## CONCRETE STRUCTURE DESIGN AND CONSTRUCT

Foundation concrete structures is our forte. We provide concrete construction with our major works surrounding formwork, reinforcement, and concrete placement. We provide design and

construct options to build complex structures such as strip footings, pads, rafts/crane bases and pile cap foundations.

## REMEDIATION

Our specialist environmental remediation company SLE Environmental services environmental

remediation for soil, groundwater and surface water projects Australia wide.

## CIVIL CONSTRUCTION & SUBDIVISION WORKS

In partnership with a vast network of contractors, we provide civil construction solutions containing but not limited to:

- Building bench sub-base preparations
- Heavy industrial and light

commercial ground slab preparation and placement

- Asphalt paving boxing, sub-base preparation, kerb construction and asphalt placement
- Sub-soil drainage detailed excavation works.

# OUR PROJECTS

**HAWTHORN PARK**  
BASEMENT PACKAGE +  
ENVIRONMENTAL REMEDIATION

**LOCATION:** 33-57 CAMBERWELL ROAD, HAWTHORN EAST  
**CLIENT:** HICKORY

**THE MALT DISTRICT**  
BASEMENT PACKAGE +  
ENVIRONMENTAL REMEDIATION

**LOCATION:** 2 GOUGH STREET, CREMORNE  
**CLIENT:** PROBUILD

**BILLS ST SOCIAL HOUSING**  
BASEMENT PACKAGE +  
ENVIRONMENTAL REMEDIATION

**LOCATION:** 1-12 BILLS STREET, HAWTHORN  
**CLIENT:** HANSEN YUNCKEN

**VICTORIA AND VINE**  
BASEMENT PACKAGE +  
ENVIRONMENTAL REMEDIATION

**LOCATION:** 1-57 WELLINGTON STREET COLLINGWOOD  
**CLIENT:** HICKORY

**NEXUS CORPORATE MULGRAVE**  
BASEMENT PACKAGE +  
ENVIRONMENTAL REMEDIATION

**LOCATION:** 633 SPRINGVALE ROAD, MULGRAVE  
**CLIENT:** SALTA
